
JURAJ GABRIEL

PROFILE

I studied management and economics and until recently worked as branch manager for a car rental company. I have always had a keen interest in technology and computers, so I have decided to change my career path and focus primarily on improving my IT skills full time, studying programming, software development and current trends. I believe my past experiences, strong communication and problem solving abilities together with general knowledge of IT provide good foundations to build upon. My past working experience were focused mainly to management and automotive sector.
